Professional Summary

Information Science and Engineering student with a strong foundation in Java, Data Structures and Algorithms, SQL and Web Development. Passionate about building efficient software solutions and eager to apply technical and problem-solving skills in a software development role.

Education

RNS Institute of Technology — Bangalore
Bachelor of Engineering in Information Science and Engineering (CGPA: 9.32/10) — *2023 – 2027*

Technical Skills

Programming: C, Java, Python, JavaScript
Frameworks: Java Collections Framework, Spring Boot
Web Development: HTML, CSS, React
Database: MySQL, PostgreSQL
Tools: VS Code, IntelliJ IDEA, Git, GitHub, Maven, Postman

Experience

SmartShelfX – AI-Based Inventory Forecast — Oct 2025 – Dec 2025
Infosys Springboard Internship 6.0 – Infosys Limited (Remote/Virtual)

- Developed backend REST APIs using Spring Boot for inventory, product, and sales modules, including endpoints for demand forecasting, and AI-based recommendations.
- Integrated Google Gemini 1.5 Flash API into the backend to generate AI-driven demand forecasts, stock recommendations, and seasonal trend analysis by aggregating real-time inventory data (stock levels, sales history, turnover rate) into structured prompts.
- Built REST controllers (`AiController`) exposing forecast, recommendation, movement analysis, and chat-assistant endpoints, secured with Spring Security using role-based access control (Admin/Manager).
- **Tech Stack:** Java, Spring Boot, PostgreSQL, Spring Data JPA.

Projects

Eazystore | *Spring Boot, React, REST APIs, Hibernate (JPA), MySQL, Maven* | GitHub

- Built a full-stack online store for creative, high-quality stickers with a React frontend and Spring Boot backend.
- Implemented REST APIs for product listing, cart, and order management with Hibernate (JPA) for ORM and MySQL as the database.
- Used Axios and React Router on the frontend for seamless navigation and API communication.

ComposeSmart | *Spring Boot, React, Chrome Extension, REST APIs, AI Integration | GitHub*

- Built an AI-powered email reply generator delivered as a Chrome extension, integrated directly into the Gmail compose window.
- Developed a Spring Boot backend to process email content and generate context-aware reply suggestions via AI integration.
- Designed a React-based frontend and browser extension UI for seamless reply generation within the user's workflow.

Certifications

Java Full Stack Developer – Coursera (Board Infinity)
Networking Basics – Cisco Networking Academy
Introduction to Artificial Intelligence – IBM & Coursera

Achievements

- Won **First Place** in the Science Model Expo conducted by the Department of Physics (Project: Smart Irrigation System).
- Won the **Best Project Award** in PROP (Project Open House Panorama) under the category of Mechatronics (Project: Smart Mop).

Additional Information

Languages: English, Kannada (Native), Hindi
